

APPENDIX A
SUMMARY OF ANALYTICAL RESULTS

APPENDIX A TABLES

A-1	Total Petroleum Hydrocarbons in Soil
A-2	Semivolatile Organic Compounds in Soil
A-3	Volatile Organic Compounds in Soil
A-4	Metals in Soil
A-5	Polychlorinated Biphenyls in Soil
A-6	Total Petroleum Hydrocarbons in Groundwater
A-7	Semivolatile Organic Compounds in Groundwater
A-8	Volatile Organic Compounds in Groundwater
A-9	Metals in Groundwater
A-10	Volatile Organic Compounds in Soil Vapor

Appendix A Table Notes Astoria Area-Wide Petroleum Site Astoria, Oregon

All non-detect values are 1/2 the method reporting limit.

bgs = below ground surface.

DEQ = Oregon Department of Environmental Quality.

>Csat = This soil RBC exceeds the limit of three-phase equilibrium partitioning. Soil concentrations in excess of Csat indicate that free product might be present.

>MAX = The constituent RBC for this pathway is greater than 100,000 mg/kg. The total petroleum hydrocarbon RBC is greater than the maximum amount that would be present if all of the initial air space were filled with petroleum product. The DEQ believes it is highly unlikely that such concentrations will ever be encountered.

>S = This groundwater RBC exceeds the solubility limit. Groundwater concentrations in excess of S indicate that free product may be present.

mg/kg = milligrams per kilogram.

mg/L = milligrams per liter.

µg/L = micrograms per liter.

µg/m³ = micrograms per cubic meter.

NA = not applicable; RBCs are included for chemicals of potential concern only.

NV = no value.

ppbv = parts per billion by volume.

ppmv = parts per million by volume.

R = datum rejected.

RBC = risk-based concentration.

U = not detected at the method reporting limit.

^aDEQ RBC for Chromium VI.
